## Ad-head's Will Issue Calgary Brake Stickers

Ad-head Garage has been officially appointed by the Calgary Police Department to test automobile brakes and to issue stickers as required by the City of Calgary.

The police department makes a thorough investigation as to the efficiency of the mechanics and the quality of the brake lining used before granting permission to issue stickers.

## Feature Pictures Are Coming to Movies

During the next few weeks the Didsbury folks will have the opportunity of seeing the best line of feature pictures that has ever been here in the same period. Every picture has attracted special attention from the movie goers of the world and each one has received the highest rating from the critics.

Mr. Sharpe is to be complimented on obtaining such outstanding programs:

Sept. 25-26. Shirley Temple in "The Littlest Rebel."  
Oct. 2-3. Freddie Bartholomew in "David Copperfield."  
Oct. 9-10. Charlie Chaplin in "Modern Times."  
Oct. 16-17. "Naughty Marietta."

## WEEKLY SERMONETTE

"Use churches as you do hotels—not to live in, but to take your food and refreshment in, on the way to your Father's house. The Father's house is the only place fit for the permanent abidance of the soul."

## Streamlined C.P.R. Train Here September 21st.

Didsbury will get its first view of the Canadian Pacific's streamlined speed train, "The Chinook," on Monday, September 21, when it will make an exhibition run from Calgary to Edmonton. On the journey north it will reach Didsbury at 8:47 a.m. and going south it will be here at 8:26 p.m.

It will make a second exhibition run Friday, September 25, the time of arrival here being, northbound 8:56 a.m. and southbound 7:59 p.m.

Attracting keen interest across the Dominion wherever it has been on exhibition, this new flyer is the most modern train now operating on a Canadian railway system. It will be placed on a day-run schedule and is expected to cut down the time between the two cities from one or two hours or more as compared to the present schedule. The train can reach a speed of 110 miles per hour, but is expected to be run at about 70 miles when on the regular run between the southern city and the capital.

"The Chinook" 110 m.p.h. speedster will first operate between the two cities on the 21st, Mr. Cotterell, C.P. official said, when it will leave Calgary in the morning. It will be thrown open at intermediate points for inspection by the public. After the exhibition runs, a regular service will probably commence on a schedule now being prepared.

## Wheat Yield Set at 232 Million Bushels

The wheat production of Canada for 1926 is estimated at 232,973,000 bushels in a crop report issued last Thursday by the Dominion Bureau of Statistics. Of this amount 220,000,000 bushels is spring wheat and 12,970,000 bushels fall wheat. The spring wheat crop of the prairie provinces is estimated at 216,000,000 bushels.

The total wheat crop of Canada last year was 277,339,000 bushels.

The bureau estimates the 1936 oat crop at 274,463,000 bushels, nearly 120,000,800 bushels under the 1935 figure.

Barley production is placed at 74,376,000 bushels, about 8,600,000 bushels less than in 1935.

## Debt Reduction Act Test Opens Before Court

First test of the validity of the Reduction and Settlement of Debts Act passed by the recent special session of the Alberta legislature was started at Edmonton Thursday last in Supreme Court chambers.

Application for right to foreclose on a 160 acre farm was asked in behalf of the Mutual Life Assurance Company.

Notice of intention to proceed with the application had been served on Attorney-General J. W. Huggill. With consent of the court, hearing of the application was set over until October 1.

The application was made on the grounds that the Reduction and Settlement of Debts Act is ultra vires of the province.

The Interscholar Track Meet will be held on Friday, October 9, instead of October 2, as previously announced. The teachers' convention for the Olds Inspectorate will be held on Friday, October 2.

## Ducks Are Plentiful.

A good many of the local nimrods were out after ducks on Tuesday afternoon, which was the opening of the duck shooting season.

They reports that ducks are more plentiful than they have been for years. Ed Watkin, Jack Fleury, Len Berscht and John Thomas are reported to have got their limit, and other sportsmen report good bags.

Reports are that land birds are very scarce, it being thought that they were killed by the hail storms.

## Golf Notes.

The rubber in the friendly golf tournament between the Carstairs and Didsbury Clubs, was played on Sunday. The first nine holes were played on the Didsbury links when the locals took the lead by 22 strokes—496 to 518. The second nine holes, played at Carstairs, resulted in a tie, 445-445. Following are the individual scores:

Didsbury		
McGhee	44	38 82
McFarquhar	47	39 86
Fisher	45	46 91
Watkin	50	41 91
McKenzieGrieve	52	41 93

## Four Farmers Receive Minor Injuries

There was an epidemic of minor accidents in the Didsbury district last week and Dr. Clarke had a busy time binding up wounds.

Friday, Douglas Landeen had the misfortune to strike his hand with an axe while building or fixing a pen. He had to have a finger amputated at the first joint.

There were three victims of accidents on Saturday. John Kershaw had a finger badly lacerated by a pig he was loading, and it was also necessary to amputate his finger at the first joint.

Arnold Thurlow sustained a badly fractured arm, both bones being broken, while breaking in a colt. He got his arm entangled in the rope, which resulted in the fracture.

Adam Luft, of Elkton, received a kick from a horse which drove his elbow into his side, damaging his kidneys and probably causing other internal injuries.

## Evangelical Church Notes.

The Junior E.L.C.E. will meet for organization on Monday evening September 21 at 7 o'clock; and the Senior E.L.C.E. will organize at 8 o'clock the same evening. A social evening will follow the senior organization. A full attendance is requested at each of these meetings.

## The Search For Economic Safety

One frequently hears it said nowadays that the subject of economics should find a place, and an important place, on the curriculum of the public and high schools.

The proposal has arisen, no doubt, out of the depression from which the countries of the world have been suffering and their populations groping, more or less in the dark, in the hope of finding a way out of the financial and economic difficulties which are besetting them and from which apparently a slow, but is to be hoped a sure, emergence is in progress.

It is urged that matters pertaining to currency and credit are complicated and that the average person arrives at the so-called age of maturity and discretion with very little knowledge to guide him on topics which, after all, are of great importance to everyone. Even the fundamental principles are obscure to the average man, and this applies not only to the farmer on the land and the merchant in the country store, but to the average business man in the larger centres.

It is pointed out that after all it is the average elector who must decide what course his country, his province or his community must take through what, to the great majority, is an uncharted sea, at any rate uncharted and unknown so far as they are concerned. It is the average elector who goes to the polls and gives direction, through his vote, to his representative who naturally feels that it is incumbent to carry out the mandate thus conferred upon him.

And in recent years, as a result of general and local conditions, these mandates have largely taken the form of instruction as to what policies should be pursued in regard to questions respecting the uses of currency and credit and the forms they should take. These have lately become important issues in elections, both in restricted community areas as well as in the wider provincial and national fields, not only in this country but in the majority of countries in the civilized world.

This being the case, it is highly important that the electorate should be well posted on at least the fundamental principles underlying the various economic theories presented for their approval or rejection and as to whether or not they are feasible. When new experiments in financing are proposed the electors should have some knowledge as to their feasibility or otherwise and some history, if such is available, to guide them as to the results of similar experiments in the past and elsewhere.

Unfortunately this is not always the case. One hears a great deal of discussion on economic topics wherever groups are gathered together. Some of the contributions to these discussions are based on sound facts and known principles and some, on the contrary are based on pure theorization and largely inspired only by a very natural desire to try something which may prove a panacea.

Equally unfortunately, however, there is always the risk of an uninformed electorate, or an electorate not well grounded in fundamentals, rushing into some experiment which might prove to be disastrous in its effects and result in stepping "out of the frying pan into the fire."

These statements are not made with the intention of decrying experimentation in the economic field. On the contrary. The world and conditions in the world are changing almost daily. Progress must and will be made in this as in other spheres of life. In the field of medicine, in the field of science and in other departments of life, enormous progress has been made in recent years, and largely as a result of experimentation, but usually it will be found that this progress has resulted by moving forward step by step along the path of construction on accepted fundamental facts. In these fields results are usually only achieved by workers who know and understand basic principles.

Fortunately the public is awakening to a realization that if they are to guide the destinies of themselves and their fellows successfully in the economic sphere they must have a grounding of reliable information on which to base their conclusions and to apply as tests. This is demonstrated by the tremendous increase in the sale of books and pamphlets on these and kindred topics in the last few years and in the increased demand for such works at the public libraries.

The greatest immediate danger that exists in this widespread demand for information is the possibility of confusion on the part of readers who are bombarded on all hands with innumerable theories; but this danger may be avoided or at least partially offset, if the reader will search for definite proven facts, in the light of history and experimentation, and proceed from there to build up his conclusions as to what may be safe and what dangerous.

The proposal to make economics a more important subject of study for the youth of to-day in the schools is one that has considerable merit, but until a new generation is grounded in fundamental and practical principles, the adults who are being called upon to determine policies for present day adoption must necessarily continue to seek guidance from available literature plus their own good common sense.

### Stages A Surprise

#### Geyser In Yellowstone Park Betters Its Own Record

The longest and shortest intervals between eruptions of Old Faithful Geyser were recorded at Yellowstone Park, Wyoming, recently. The usually reliable geyser spouted once at 11:56 a.m. and then burst into action again at 12:26 p.m., a wait of only thirty minutes. Then followed an interval of 92 minutes, or until 1:58 p.m. Old Faithful seldom varies from 65-minute intervals between outbursts.

#### Most Unusual Catch

Topping the unusual catches of veteran anglers fishing Quebec waters this summer are a pair of Siamese twin fish recently displayed in Montreal. The fish, members of the guppy family, are getting along well together.

England's average annual income per capita is about \$250.

### Football Fans Defy Fire

#### Firemen Had To Force Them From Grandstand In Australia

Three thousand football fans sat amid the smoke of an uncontrollable fire in a grandstand in Sydney, Australia, and engrossed in the game, they refused to move until forced to do so by firemen. A few minutes after they had left flames burst through the floor. Until the firemen acted the fans regarded the blaze as a joke, and paid closest attention to the game, which was continued despite the fact that clouds of smoke were blowing across the field.

#### Inscription Is Brief

The briefest inscription which has ever appeared on a field marshal's baton is on that which the Duke of Connaught, as senior Field Marshal of the British Army, handed to his great-nephew, the King, at Buckingham Palace. It reads simply, "His Majesty King Edward VIII., field marshal, January 21, 1936." 2165

### Predicts Long Drouth For U.S.

#### Weather Man Would Move 59,000 Families From Dry Areas

Migration of 59,000 families from the drouth-damaged farms of the great plains of the United States was recommended in a population survey of that area by Dr. C. W. Thornthwaite, former University of Oklahoma climatologist.

His study, published by the University of Pennsylvania, contended wind erosion had damaged 65 per cent. of the plains region, extending from the Canadian border into the Texas Panhandle.

A long-range government program for the return of millions of acres of wheat land to its native sod, he said, might be the only means of checking the devastating dust storms.

Observing long dry spells have been frequent in the history of the plains, Thornthwaite predicted "the present drouth might be prolonged for 20 or more years.

Evidence from tree rings, lake levels and other sources was cited in the survey to show a 40-year drouth began in 1825 and was interrupted by only occasional wet years.

But the weather expert estimated that a minimum of 12,610 families should move out of Montana, the state in which he reported the greatest "surplus population." He urged a migration of 12,200 families from Texas and 7,360 from North Dakota. Heavy removals also were suggested for South Dakota, Nebraska, Kansas, Oklahoma, Wyoming and Colorado.

"The ideal situation in the great plains," he said, "would be a practically complete return to a grazing economy where pasturing on the range is supplemented by the raising of feed and forage crops."

### Newspaper Favors

#### Many People Who Are Expecting Something For Nothing

We have often reflected upon the slowness of people to thank editors for the favors which newspapers do for them. Individuals and organizations are constantly asking for publicity to assist them in promoting various kinds of worthy causes. Space is the only commodity aside from circulation which publishers have to sell, and this is a fact which too many seem to forget. Some are even critical of the favorable notices which we give them and their projects. A still greater number forget to make any acknowledgment of the courtesy extended to them. We have in mind a biblical instance of ingratitude in which only one in 10 was thoughtful enough to return with thanks on his lips and in his face.—Toronto Mail & Empire.

### Leaves Estate To Secretary

#### Fleet Street Writer Gave Fortune To Lifelong Friend

The estate of Arthur Anthony Baumann, London, one of the best known of Fleet street writers, was probated at \$86,000 (\$430,000). He left practically all of it to his secretary and lifelong friend, George Browning. Both were bachelors and lived together for 46 years. Baumann suffered paralysis for 12 years and Browning taught him to use his left hand. Baumann was 80; Browning is over 70.

"Do you know why your stories aren't a success?"

"I can't imagine!"

"Yes, that's the whole trouble."

# DIXIE

PLUG SMOKING TOBACCO

### All Of Same Make

#### King Edward's Car Thirty-Seventh Made For British Royalty

The first royal car in the world—it is still in running order—was a 6-horse power one supplied to King Edward VII., then Prince of Wales, in 1899, states the Overseas Daily Mail. From that year the Kings and Queens of England have owned thirty-six state cars, all of the same make. King Edward's new car is the thirty-seventh. The last big car used by King George was made specially for his Jubilee tours in London.

### SELECTED RECIPES

#### UPSIDE DOWN CAKE

Place 2 tablespoons butter and 1 cup brown sugar in well-greased pan and heat until sugar has dissolved. Cool, and place layer of pineapple, apricots, peaches or any other cooked fruit in syrup. Sprinkle with coarsely chopped nuts and cover with following batter:

- ¾ cup butter
- ¾ cup fruit sugar
- 2 eggs
- 1½ cups Purity flour
- ¾ cup milk or fruit juice
- 3 teaspoons baking powder

#### Had Ballots In Pocket

#### Idaho Judge Was Too Busy Ploughing To Count Votes

After many fruitless telephone calls, unofficial calculators of the primary election reached the wife of a precinct judge in remote southeastern Idaho.

The returns? No, she was sorry she didn't have them. She didn't think Henry had counted the votes yet.

"He's out ploughing and has the ballots in his overalls pocket," she explained. Henry was in a field 10 miles from a telephone.

### Trapped For Six Months

#### Soviet Soldiers Caught In Mountains By Great Blizzard

Three Soviet Robinson Crusoes, trapped in the blind, snowfilled mountain passes of Western Siberia without supplies, not only maintained themselves for six months, but also several escaped convicts, border jumpers and other criminals they captured, according to a drama-filled saga printed in the "Krasnaya Svezda," the official newspaper of the Red Army.

The three Red Army men left Novosibirsk Sept. 3 of last year for a mountain post carrying a month's supply of food and ammunition. A great blizzard swept the land two weeks later. When the men crept from their bough huts, every outgoing pass was obliterated. A border patrol sent to search for the men returned empty handed.

Again in March of this year, when the mountain snows were melting, a squad of soldiers set forth, this time believing they'd come upon the skeletons of their buddies. Approaching the camp, they saw a thin wreath of smoke in the air. Rifle signal was returned with rifle signal. The bearded Crusoes tumbled into the arms of their rescuers.

The marooned men had built themselves stout bough huts, lived on wild game, with which the region abounds, perfecting themselves in marksmanship so that no bullet was wasted. They had not had bread for six months.

Several lawbreakers, whom they'd picked up in the mountains, and who had lived freely with the Red guards, went back to civilization with them.

A woman residing in Durham, England, is reported to wear size 21 shoes.

The advantage of using a taxi is that you feel so happily neutral when a fender is crumpled.

Warehouses at Calgary, Edmonton, Regina and Winnipeg

## Original Gardens On This Continent Cultivated By Indians with Primitive Tools

(By E. M. Straight)

In any consideration of early gardens on the North American continent, the contribution, small though it be, of the North American Indians to horticulture should not be forgotten. As one writer has said, it was the Indian who taught the white colonists their native agriculture, "to cull out the best seeds, to observe the fittest season, to keep distance for holes and fit measures for hills, to worme it, and weed it; to prune it and dress it as occasion shall require." To the Indians, therefore, some honour is due, for not only were they the first gardeners in North America, but they did their work without modern tools both in the clearing of land and in the making of the garden.

In that branch of the Algonquin family commonly known as Virginia Indians, every family, at the time when the white people founded Jamestown, had its garden, generally 100 x 200 feet, carefully cultivated. Their market was in their own homes, and hence needed no Marketing Act in the disposal of produce. In clearing new land, the trees were girdled near the ground by bruising the bark. When sufficiently dried, the trees were felled by the aid of fire and stone axes, and the stumps burned. In preparing a field, the ground was worked over with wooden instruments, made somewhat like mattocks or hoes with long handles. The weeds and corn-stubble were dug up and allowed to dry, then made into heaps and burned.

The women's planting implement, which they used sitting, was about a foot long and five inches broad. Beginning at the corner of the field, the women made a series of holes, about three feet apart, into which they placed four grains of corn and two beans, and covered them with earth. Occasionally, a vegetable of one variety occupied a bed by itself, but usually various species were grown together in the one field. The gardens were carefully weeded by the women and children. When the corn was about half grown, it was hilled. Little houses or shelters, raised upon platforms in the fields, were occupied by watchers, whose duty it was to keep the birds from injuring the crop.

The crops raised were corn, beans, pumpkins, squashes, tobacco and sunflower. Of the four varieties of corn, one of the early kinds was only three or four feet high and bore an ear not more than six inches long, but an attempt was made to grow two crops of this corn in the one season. The two varieties of late corn would be known today as Flint corn in the one case, having the plump grains, while the other was the Dent corn, well known to all farmer folk as the corn with the dent or depression in the outer end of the kernel. Much of the corn ears were of various colours, as the so called Squaw corn is today, white, yellow, red, while others were blue of various shades but usually mixed in the most fantastic colour pattern.

The beans of the Indians were usually of several colours and sizes. The "Pease" mentioned by the early writers were in all probability small beans. The pumpkin was grown all through the country as far North as the St. Lawrence. The melon too was grown by the Indians and mentioned by the early French writers. These melons were probably the progenitors of the Montreal musk melon. The Sunflower was cultivated for its seeds, which were used to make both bread and broth, while the tobacco, called by the natives "Apooke", is described as being poor and weak as compared to the tobaccos known to the white men. The plant was dried over a fire, or sometimes in the sun, and crumbled to a powder, stalk, leaves and all.

In harvesting, the corn was picked and placed in hand baskets and emptied into larger baskets. The ears were thoroughly dried upon mats, care being taken to protect them from the dew by covering them at night. When sufficiently dried, the corn was placed in the house in piles and shelled by twisting between the hands. The shelled corn was then

placed in the houses, sometimes occupying all the space available.

At certain seasons the Indians lived on fish, squirrels and turkeys, where turkeys abounded, and on the flesh of many animals if it could be obtained, but in season they depended largely upon their gardens and such wild plants as acorns and berries. Later in the year both flesh and vegetable products were dried and thus preserved for the winter when danger of famine was often in the offing. However, at certain seasons food was abundant, for it is on record that Captain Argoll obtained by barter from the Chief Potawomack nearly 400 bushels of corn and beans. Captain Smith procured from Powhatan two or three hundred bushels of corn for a pound or two of blue glass beads.

### Turning Plague Into Profit

#### Missouri Farmers Trap Grasshoppers For Winter Poultry Feed

The farmers around Aldrich, Missouri, apparently do not believe in the saying that there is nothing new under the sun.

At any rate they have devised a new way of turning the grasshopper plague in their part of the country into a source of profit.

Chickens and turkeys grow fat on live grasshoppers. The folks around Aldrich are now going to feed them in winter on dried grasshoppers mixed with bran. The majority of the farmers catch the hoppers by digging holes in the ground and driving the hoppers into them. One man rigged up a "hopper hopper" under his car and sweeps up the insects as he drives over his land.

A preacher, who has figured out that it takes 50 big or 100 little grasshoppers to fill a quart jar, says that no one would be on relief "if the Government would pay for them by the pound."

The Chinese have been drying grasshoppers from time immemorial, and eating them much as we do peanuts, but this is the first time in history, as far as we know, that grasshoppers have been turned into winter poultry feed.

Young people, with a defeatist complex, who think that opportunity has departed from this fair land of ours, will note in this story another of the opportunities which are lying all around them waiting only for an idea to seize them.—Detroit Free Press.

### Bad Handwriting

#### Writer Says For Illegible Signatures There Is No Excuse

Any mishandling of one's name has a peculiar touch of offensiveness, no doubt because each of us has come to identify his own name with a most acute and intimate sense of individuality. A mangled name becomes a personal affront.

It is necessary, however, to be discriminating in our sympathy. It cannot be given if the mistake represents a forlorn attempt to interpret bad handwriting. For an illegible signature there is no excuse. Far too many people seem to think that an undecipherable scrawl is the mark of a rare personality, possibly even of genius. Some of those who suffer from that delusion have at least the inconsistent grace to give a typed version beneath the cryptogram. In extreme cases the writer sinks to the depths of shamelessness by appending his own manufactured translation in block letters. A signature that can be read is surely just as much a public and private duty as intelligibility of speech.—London Times Weekly.

#### Carves Violin With Knife

Using an ordinary jackknife Angel Goni Navarcorena, 21, of Pampalona, Spain, has carved a violin out of walnut in the spare time between his agricultural labors. He has learned to play the instrument of his own making and is indispensable at local fetes and dances.

Railway receipts in the Irish Free State are much higher than a year ago. 2165

### Expert Gives Advice

#### Tells Farmers Alfalfa Best Feed For Dairy Cows

For better milk—and more of it—C. E. Reed, of Washington, advised Michigan farmers to grow more alfalfa.

Reed, chief of the United States of Dairy Industry, prescribed "good alfalfa hay" as the best feed for dairy cows, in a speech prepared for delivery at the annual farmers' day program at the Michigan State College.

"Shifting acreage from soil depleting crops to such soil improving crops as alfalfa serves the best interests of the dairy industry in several ways," Reed said.

"Growing and feeding good quality roughage enables the dairymen to produce the best milk and cheapest milk, and conserving the soil fertility with grasses and legumes pays extra dividends."

State College experts demonstrated new methods of storing ensilage. In one silo that was to be opened, alfalfa was stored with dry ice, which chilled the contents and at the same time threw off a gas believed to be helpful in the prevention of mold. The value of molasses as a preservative of ensilage was illustrated by another silo.

There were similar demonstrations of other phases of field and animal husbandry, with emphasis on cheaper irrigation and solutions for various problems created by drouth. Methods of controlling insect pests also received attention.

### Insects To Kill Insects

#### Entomologists In Vancouver Release Tiny Flies To Fight Earwigs

Because it takes a fly to kill a fly, entomologists in B.C. have let loose 69,000 tiny flies this year to do battle with earwigs. An additional 3,000 flies will be used to control the holly leaf miner, a maggot that later develops into a fly.

Parasitology, the science of pitting insects against insects, has come into the limelight, even superseding in some cases the old method of controlling destructive pests of farm and garden by poisoning.

For two years the entomological laboratory in Victoria has been at work producing anti-earwig parasites. A year ago they released an army of 25,000 flies.

W. Downes, Dominion entomologist, directing the parasite war in British Columbia, received new recruits recently when 4,000 flies, no larger than the smallest ants, arrived in three flat wooden boxes to join the battle.

Mr. Downes stated it would take years before the anti-earwig parasites made any appreciable inroads on the billions of earwigs.

It is estimated that there are 9,000 people engaged in giving instruction on the roads. Not counting wives.

Red light symphony. He who hesitates is last.

## Illustration Station System A Development Project Which Has Proven Value

### Woman Manages Bee Farm

#### Has Made Success Of Business In New South Wales

From Sydney, Australia, comes this story: Although 80 years old, Mrs. Smee still runs her own bee farm in New South Wales, and was the oldest and only woman delegate attending the Commercial Apiculturists' Association conference in Sydney.

Of remarkable physical and mental powers, she is the perfect small farmer, controlling her marketing as well as production.

She has 20 hives of bees on her 10-acre orchard which is said to be the least infested by pests in the state, 150 fowls which have made her famous for new laid eggs, and large beds of flowers which she grows to provide honey for her bees and blooms for the market. She sells sand from her land to builders at \$10 a week, and disposes of the produce from her orchard in her own little shop.

"I don't know why women are so frightened of bees," she said. "The insects are like people—they get to know you. They are nervous little creatures, and take alarm at strangers. Even if I go near them in a different dress they are disturbed. What does a sting or two matter anyway? They are so good for rheumatics that the Italians take medicine from them. I'm always out in the damp grass, but I've never had a twinge because of the stings I get."

Don't know how you feel about it, but "she's a better man than I am." I have no desire to be stung—by a bee or in any other way, but then, thank fortune, I have no rheumatism!

### To Ease The Brain

#### Brief Period Of Mental Rest Obtained By Automatic Brake

Discovery of an automatic brake which turns the human brain's thinking machinery off and on was reported by University of Chicago psychologists.

The brake goes on when the mind gets weary, and releases itself after a brief period of mental rest. Prof. Arthur G. Bills, leader of the group which made the discovery, explained.

It is this brake, Professor Bills said, which causes the stutter "Uh's" which some lecturers interpose between every half dozen or so words.

The thinking apparatus comes to a dead stop, creating periods of mental blankness, during the braking periods, the psychologist asserted. To explain it, he advanced the hypothesis that there was "some depletion in the available energy in specific response 'systems' which temporarily upset the delicate balance in the brain."

The old saying "an ounce of experience is worth a ton of theory" is peculiarly applicable to the Illustration Stations System of the Experimental Farms Branch, Dominion Department of Agriculture inasmuch as the ounce of experience put into the ordinary farm under supervision is the result of a ton of practical work which had its inception in progressive theory. The illustration station is a community development project and stands as a unit for helpfulness in its neighbourhood. There are 223 such units throughout Canada and they also serve as a connecting link between the Experimental Farms and the farmers of the various districts.

When an Illustration Station is established, the first essential is to develop a crop improvement program to systemize the work by creating a rotation adapted to the district and to provide the necessary feed for the animals on the farm. Later, the breeding phase of the work is developed, including the use of purebred qualified sires, as well as the weeding out of low producers by use of dairy records. On an Illustration Station the objective is not only to develop an improved herd for the monetary consideration of the farmer on whose farm the Station has been established, but eventually to create a source from which neighbours may obtain breeding stock. During the past season, operators on Illustration Stations in the various districts disposed of 235 head of cattle, 158 sheep, 496 swine, and 89 foxes as breeding stock.

In poultry, a concerted effort has been made to arouse greater interest in the proper housing, feeding, and development of the flocks at the Stations. Special attention has been directed to develop the stations as seed producing centres. During the year ended March, 1935, station operators sold to their neighbours 37,390 bushels of seed grain, 7,330 bushels of seed potatoes, and 33,317 pounds of grass and clover seed.

While Illustration Stations are primarily concerned with problems relating to crop and livestock production, the possibility of developing and maintaining attractive home surroundings and adequate buildings is given due consideration. Shelterbelts, hedges, shrubbery, lawns, perennial and annual flower borders are being steadily developed, and building plans for new homes, barns, and out-buildings are discussed with operators as required. In short, efficiency in production and advance in quality of output, together with convenience and comfort in living on the farms of Canada are the concerns of the Division of the Illustration Stations.

### Jewish Cave Tomb

#### Walls Are Decorated With Carving, And Other Symbols

A perfectly preserved cave-tomb which was used by a noble Jewish family during the second and fourth centuries A.D., has just been uncovered in the northwestern part of the Plain of Esdraelon, near Sheikh Abreik. The walls were decorated with carvings and pigment illustrations of seven-branched candelabra and other Jewish symbols. It is hoped that the discovery of a cave-tomb in this district during the period when Christianity was beginning to spread throughout the Old World will shed light upon Jewish life of this period.

### One Idea Of Luck

First Navy: "Well, poor old Jim's gone."

Second Navy (scornfully): "Poor, indeed! Luckiest bloke in the market. Couldn't touch nuthin' without it turned to money. Insured 'is 'ouse—burned in a month. Insured 'isself again' haccidents—broke 'is arm first week. Joined the Burial Society last Wednesday, and now 'e's 'opped it. I call it luck."

If you wake at 5 a.m. and it seems a shame to go back to sleep, you aren't young any more.

Nature has arranged things so that a poor man is able to display as many virtues as a millionaire.

## Lovely Crochet Has a Practical Use

Household Arts by Alice Brooks

A Beginner Can Crochet These

PATTERN 5671

Add a personal touch to a dainty gift, or a delicate bit of trimming to your own household linens or lingerie! You'll enjoy crocheting these delightful lace edgings—so simple to do that even the beginner need not hesitate. The very narrow one is just like a bit of tatting only it's quicker to do—another boasts a lovely matching insertion! Ideal in crochet cotton, some also are effective in string. In pattern 5671 you will find directions for making the edgings shown; material requirements; suggestions for varied uses.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

### Items of Interest

L. W. Brockington, K.C., of  
Winnipeg, and former city solicitor  
of Calgary, has been appointed  
chairman of the board of governors  
for the Canadian Radio Broadcast-  
ing Corporation. This is an advis-  
ory position and Mr. Brockington  
will remain general counsel for a  
grain dealers' association.

Basic dividends would be paid in  
about three months to Alberta citi-  
zens who co operate by signing the  
registration forms, it was promised  
by Premier Aberhart and the Hon.  
W. W. Cross, minister of health,  
when they recently addressed a  
crowd of about 2,000, the largest to  
ever gather in Fairview. There  
was "everything to gain and nothing  
to lose," the Premier asserted in  
urging citizens to register.

Fisherman's Luck came to R. G.  
Mould of Calgary last Wednesday  
evening. When fishing in the Elbow  
River just outside the Calgary City  
limits he landed a rainbow trout  
which weighed eleven and a half  
pounds, measured twenty-nine inches  
length and seven and a half inches  
across the deepest point of girth.

### SOCIAL CREDIT NOTES

The Didsbury Social Credit Group  
No. 1 held its regular meeting and  
celebration of its 2nd birthday at  
the home of Mr. and Mrs. A. Sch-  
wesinger. The President, Mr. A.  
Schwesinger, gave a resume of the  
activities of the said group during  
the last year. Voluminous corre-  
spondence was read and other im-  
portant business was dealt with.  
A vote of thanks was sent to the  
Hon. E. C. Manning for looking  
into the matter pertaining to some  
farmers not registering, but at the  
same time making their families  
register. After the close of the busi-  
ness session the ladies served sand-  
wiches and a birthday cake, with  
two candles on it to signify the sec-  
ond milestone has been passed.

Date and place of next meeting  
will be announced later.

Mrs. A. Schwesinger,  
Secretary

The Didsbury Pioneer S.C. Group  
held its last meeting at the home of  
Ben Rosenberger last Monday eve-  
ning, September 14. The question  
of devising ways and means of sup-  
porting and helping the circulation  
of the Prosperity Bonds was again  
discussed and studied, and it was  
decided to have representatives from  
this group visit the rural groups in  
the near future to discuss the ques-  
tion with them and endeavor to  
receive their co operation in getting  
more support behind the bonds and  
building up more confidence in them  
and thereby stimulating the circula-  
tion to get the most benefit there-  
from for all. A committee was  
appointed to visit the rural groups  
for this purpose. The next meeting  
will be held at the home of Otto  
Klein next Monday, September 21,  
at 8 p.m. All are welcome.

H. Erb, Secretary.

### PUBLIC NOTICE

In the interests of public health  
and in order to prevent if possible  
the recurrence of an epidemic of  
dysentery, all citizens, including the  
vendors of food and restaurant  
keepers, are urged very strongly  
to see that all screens and screen  
windows are made tight. "Prevent  
flies from getting in, but if they get  
in—swat them."

See that as much garbage as  
possible is burned, and if you can-  
not burn it all, have it placed in  
covered containers to await removal  
by the scavenger.

All toilets should be made fly-  
proof. Make all requests for the  
scavenger or sanitation service at  
the office of the Town Secretary.  
Prompt attention will be given to  
such requests, and it is hoped that  
each and every citizen will co-operate  
in keeping the town clean.

By order,  
LOCAL BOARD OF HEALTH  
DIDSBURY

### NOTICE

to Relatives of Persons on the  
Assessment Roll and to Tenants

Notice is hereby given that dur-  
ing the months of September and  
October, applications may be made  
under the provision of section 188  
of the Town and Village Act for in-  
clusion in the voter's of the town  
of Didsbury by the following per-  
sons, namely:

The wife, husband, father and  
mother and every son and daughter  
of any person whose name appears  
on the assessment roll who are en-  
titled to be placed on said list:

(a) if he or she is a resident with  
the said person within the  
town or assists him in business  
in respect of which he is tax-  
able; and

(b) if he or she is of the full age  
of twenty-one years; and

(c) if his or her name does not  
already appear on the assess-  
ment roll; and

tenants who have rented an as-  
sessed parcel for a period of twelve  
months immediately preceding the  
last day of August of this year, and  
the wife, husband, father and mother  
and every son and daughter, as  
qualified by paragraphs (a) (b) and  
(c) hereof.

## There's a RED RIVER SPECIAL For Every Sized Job

The Oliver line of threshers is complete. There's a size for  
every need and the 28 x 46 Red River Special, shown above,  
is the ideal machine for the "farmer ring" or the small  
custom run. For the smaller jobs there is the 22 x 36 and  
for the big, heavy jobs there is the 32 x 56.

All Oliver Red River Special Threshers are outstanding  
grain savers. Oliver's famous "4 Threshermen" team up to  
get the grain from the straw and the Cleaning Shoe delivers  
"the kind of grain that elevator men like to buy!"

Come in and talk over your threshing needs with us. We  
can give you the size thresher you need and you can be  
certain that it will do good, clean work at the lowest  
possible cost.

New Lt.-Governor**

Col. P. C. H. Primrose, former  
superintendent of the old Royal  
Northwest Mounted Police, and then  
Edmonton magistrate for 20 years,  
was appointed late Friday as lieuten-  
ant governor of Alberta. The  
announcement of his appointment  
was made by Prime Minister King  
at the parliament buildings, Ottawa.  
The Colonel will assume the post on  
October 1.

He is to succeed the Hon. W. L.  
Walsh, lieutenant-governor since  
May 1931. Pending the new ap-  
pointment the tenure of the office  
of Lt. Gov. Walsh had been extended  
from the ordinary retiring date  
scheduled last May.

**Burnside Notes.**

There will be a dance in Lone Pine  
Hall next Friday night, Sept. 25th.  
Rocky Mountain Rangers Orchestra

Earl Dedels was a Sunday visitor  
with Mr. and Mrs. J. S. Scharkler  
of Sunnyslope.

Misses Mina, Loretta, Hazel and  
Mr. Bert Viney were Sunday guests  
at the Eckel home.

Mr. and Mrs. Todd and son Jay,  
of Sunnyslope, spent Sunday with  
Mr. Albert Spraggs.

Mr. Wm. Lyons and Howard  
were Sunday visitors at Mrs. Joe  
Clark's.

Mr. and Mrs. Otto Bittner spent  
Sunday with Mr. and Mrs. Jim Mc-  
Culloch.

Lone Pine W.I. met at the Hall  
on Thursday last, with Mrs. J. Gar-  
ner as hostess. It was decided to  
start a fund to provide a vacation  
for the members. The prize for the  
best vegetable collection went to Mrs.  
Harry Richardson. A decision was  
made to postpone the bazaar for a  
year on account of the hail and  
drouth.

**RUGBY NOTES**

The September meeting of Rugby  
W.I. was held at the home of Mrs.  
Dobson, with Mrs. Haener as co-  
hostess. There was a good attend-  
ance this month, thirty ladies being  
present. Mrs. G. Youngs gave an  
excellent paper on the new school  
curriculum, a lively discussion fol-  
lowing it up. Mrs. H. Hosegood  
took the talk on the "League." A  
vocal solo by Mrs. McFarlane was  
much enjoyed. A contest in which  
all took part, resulted in honors  
going to Mrs. H. Hosegood. Special  
mention must be made of the beau-  
tiful flowers, especially roses, grown  
by Hostess Mrs. Haener, which  
decorated the rooms. A very pleas-  
ant afternoon came to a close with  
the singing of the National Anthem  
and lunch was then served. The  
October meeting will be held at the  
home of Mrs. O. Krebs. "Handi-  
crafts" will be the topic, under the  
convenership of Mrs. A. Krebs.

**Notes Here and There  
From the West Country.**

Mr. and Mrs. J. Hosegood were  
Calgary visitors over weekend.

The community wish a speedy  
recovery to Mrs. R. Haener, who is  
in Didsbury Hospital.

Just south of Elkton, where there  
was no hail damage, some excellent  
crops are being threshed.

Mr. Sissons and Miss M. Sissons  
of Clive were visitors with Mr. and  
Mrs. H. Hosegood last week.

Mrs. Gilson who has been visiting  
Mr. and Mrs. D. Evans for the past  
week, left for her home at Elk,  
Washington, on Saturday.

Miss Eva Brown was presented  
with a suitcase engraved with her  
initials, at a dance held in her  
honor Friday evening at the Zella  
School. Music was provided by the  
W. F. Brown Orchestra, with Mr.  
A. Hogg as floor manager. The  
presentation was made by Mr. Fred  
Hyde. At supper time there was a  
short program comprising a song  
by Miss E. Brown, a piano solo by  
Mrs. Ingham, a song by Mrs. Ad-  
ams, speeches by Mr. Adams and  
Mr. S. F. Brown, and concluding  
with two songs by Mr. C. Rowell.

**Knox United Church Notes.**

Rally Day is next Sunday and we  
want to reach our maximum atten-  
dance in both Sunday School and  
Church. We urge all parents to  
encourage their families to attend  
the special session of the Sunday  
School in the morning at 11 o'clock.  
We wish to get every class organized  
for our Fall and Winter work. We  
cannot afford to neglect the religious  
education of our boys and girls—  
this is just as essential as public  
school education. We ask the co-  
operation of all our people through-  
out the season so that our Sunday  
School work may be carried on with  
the fullest possible efficiency.

The service in the evening will be  
in charge of the pastor and will be a  
continuation of the Rally Day special  
effort. We are most desirous to  
see a large congregation. The ser-  
mon topic is, "The Function and  
Value of the Christian Church." In  
the very near future the pastor is  
planning to begin a sermon series  
on the Sermon on the Mount. Last  
year we had a series on the Ten  
Commandments. This new series  
will follow much the same lines and  
we trust that our people will follow  
the series closely. It is hoped this  
series will prove to be inspiring as  
well as instructive. The Sermon  
on the Mount has been called the  
Charter of the Christian Church,  
and no Christian can afford to  
neglect its study.

The Choir has resumed its work,  
and led in the praise last Sunday.  
There will be a special meeting and  
social on Thursday, September 17th  
(tonight), first in the Church and  
later at the home of Mrs. Pearson.  
We urge all members of the choir  
to attend.

**FARM FOR SALE.**

S.E. 35 and S.W. 36-30-2-W5.

TENDERS marked 36712, ad-  
dressed to the Clerk of the Court,  
Court House, Calgary, Alberta, will  
be received up to 11 o'clock in the  
forenoon of the 26th DAY OF SEP-  
TEMBER, A.D. 1936, for the pur-  
chase of the above property.

Location: 4 Miles from Didsbury,  
Railway Station, Post Office, Elevator,  
Creamery, and 2½ miles from  
Waterloo Church and School.

Soil: Black Loam 12 to 18 inches  
with clay subsoil.  
310 Acres good arable land, 5 acres  
pasture and 5 acres small wood,  
4 miles fencing, 2 and 3 wires.

On the lands are situate a good  
frame house 24x26 with an addition  
5x10; a frame barn 30x30 with addi-  
tion 16x30; a frame garage, granary  
and henhouse, and a dug well.

**A Campaign of Falsehood!**

The opponents of the present methods of  
grain marketing are using freely the weapons of  
abuse and misrepresentation in endeavors to  
discredit the grain trade, to force their own  
policies upon the country and to obtain an unfair  
advantage for the Pools at the country elevator  
points.

**THE FOLLOWING FACTS ARE TRUE:**

1. The Western Pools are and have been since their inception, members of the Winnipeg Grain Exchange. They continually use the facilities of the Exchange for the benefit of their customers.
2. When representatives of the grain trade were called upon to give advice to the Dominion Government in 1935 concerning the establishment of a Wheat Board; they appeared publicly before a Parliamentary Committee. On that occasion, as the first witnesses called, they advised the Government to appoint a Wheat Board, to provide a minimum price for the protection of farmers, and to use every available channel to market Canadian wheat and to maintain Canada's place in the wheat markets of the world. The representatives of the Western Pools, on the same occasion, demanded the Wheat Board Bill in its original form, under which no provision was made for a minimum price, but only for the establishment of a compulsory marketing system.
3. The Winnipeg Grain Exchange is one in the chain of world's grain markets. It is a meeting place for all buyers and sellers of grain. The grain trade has no quarrel with those who think a better method can be found, but up to date no one has discovered a method of marketing that will better serve the interests of the farmer.
4. It is the interest of the grain trade that the farmer should obtain the best possible price for his product and the maximum government support in the hour of his need. The interest of the grain trade is not thus at variance with that of grain growers; on the contrary, the grain trade realizes keenly that the prosperity of agriculture is essential to the well-being of the Dominion and of all its industries, including their own.
5. No line elevator company, any more than a Pool elevator company, designs to make profit from the fluctuation of grain prices, which are determined by numerous causes that are not, and cannot be, controlled by the grain trade, the Wheat Board or the Pools.
6. As has been stated before on numerous occasions, in the plainest possible terms, the grain trade and the Winnipeg Grain Exchange have made no representations to the Government against the fixing of a high minimum price, nor in favor of the dis-establishment of the Wheat Board or the curtailment of its activities.

**The Following Quoted Statements are False:**

1. The Western Producer, which is the organ of the Saskatchewan Pool, states in its issue of Sept. 10, 1936, that the government has decreed the death of the Wheat Board and thereby has complied with the express desire of the grain trade. THIS IS FALSE. The grain trade has expressed no such desire.
2. The same paper, in the same issue, states, "The work of a generation is to be scuttled, and its present intentions are carried out next year, and for many years thereafter, the farmers, if they have a crop, are to be thrown to the wolves of the Grain Exchange." This statement is merely abusive and its implications libellous. If it is intended to mean that the members of the Grain Exchange, which comprises all the elevator companies (including the Pools), the mills and merchants, both foreign and domestic, who compete for the sale of the Western Canadian crop, are organized for the purpose, not of service to the producer but to prejudice his interest, this statement is not only false, but must be known to be false, to the editor and owners of this paper.
3. The following statement is contained in a circular forwarded to the various organizations throughout Western Canada by the Saskatchewan Provincial President of the Co-operative Commonwealth Federation: "The Government, by setting the pegged price at 87½c basis No. 1 Nor. Ft. William, 73c to the farmer, has taken money from you and given it to the Grain Exchange." This is false and can only be based on complete ignorance or extreme malice. No line elevator company, any more than any Pool elevator, designs to make any profit from the fluctuations of grain prices. The grain trade challenges the gentleman who made this statement to explain it and prove it. It is inconceivable that the Western Pools and the elevator companies who have served the producer of Western Canada for so many years, efficiently and honorably, should be willing to belong to an institution which is organized for so evil a purpose.
4. The numerous statements being made throughout the country by propagandists that the grain trade is desirous of anything but the welfare of the farmer, or has brought pressure upon the Government with reference to the Wheat Board or the wheat policy of Canada, is untrue.

NOTE: It is understood that a Commission will shortly inquire into the grain marketing system. The grain trade invites those who have made the above statements and similar representations of fact, to appear before the Commission and support their statements by evidence and argument.

**Local Line Elevators**

## WORLD HAPPENINGS BRIEFLY TOLD

General Evangeline Booth of the Salvation Army, will leave London in November for a tour of the Far East.

The United States egg-laying record was scratched off the book by a Maine hen which laid 214 eggs in 214 consecutive days at the state experimental station in Monmouth.

Although deaf since birth, B. L. Pitcher, 26, of Worthing, England, has taken his bachelor of science degree (second-class honors) at the London University.

Hans Eduard Giese, 32, was beheaded in the first execution under Germany's new death penalty for kidnapping. Giese was convicted of kidnapping the 11-year-old son of a Bonn merchant, June 14.

H. A. Taylor of Clear Prairie, west of Faust, Alberta, has not got hot and cold running water at his farm home but he has running water. He diverted a small stream and now fresh water flows by his doorstep.

The last remaining link between Emperor Haile Selassie and his East African empire was severed by the Italian invaders with publication of a decree confiscating all the fugitive emperor's property and possessions.

Hughenden Park, historic Buckinghamshire estate, which was the home of Benjamin Disraeli, has been bought by High Wycombe borough council as a memorial to King George.

Reviving diplomatic tactics rare since prohibition days, the British government has made representations to the United States against coast guard seizure of an alleged rum runner flying the British flag.

Discovery in Saskatchewan of a triceratops, a species of horned dinosaur, has aroused interest in the Royal Ontario museum of palaeontology since the museum possesses no specimen of this type.

### Clears Up Puzzle

#### Rings On Fish Provide Data For Their Movements

Microscopic annuli, or growth rings, on the scales of striped bass are providing science with new data explaining for the first time the mysterious movements of fish that have puzzled fishermen for generations.

Daniel Merriman, graduate student in zoology at Yale University is completing an extensive study of the growth rings on bass at the mouth of the Niantic river, and has found that the rings correspond to the growth rings of trees. Studied under a microscope, the annuli reveal the age of the fish, the rate of growth, and whether it goes south in winter.

"If the fish spends most of its time in warm water, going south in winter, it grows faster and the space between the rings is wider," Merriman declares. "The reverse is the case if the bass spends its time in colder waters along southern New England shores."

"This latter condition has been found to be the case in about 10 per cent. of the scales examined thus far, indicating that a large majority of striped bass found in Connecticut waters go south for the winter."

By means of netting, tagging and releasing more than 500 of the fish in the Niantic river, data indicating the time of bass migrations also is being studied. Based on returns by fishermen of about 8 per cent. of the numbered tags, it is apparent that the spring migration northward arrives in April and moves along toward Rhode Island through May and June.

### Makes A Difference

"What is the matter, my little man?" asked a sympathetic stranger of a small boy whom he saw crying in the street.

"Please, sir, my dog's dead," sobbed the boy.

"Well," said the man, "you mustn't make such a trouble of it. My grandmother died last week, and I'm not crying."

"No," said the boy, "but you didn't bring her up from a pup!"

There are references to blood transfusions in the writings of the ancient Greeks, Romans, and Egyptians.

### One Market Neglected

#### Canada Could Sell More Bacon Hogs To Great Britain

While Canada has been searching the world for new markets for wheat a profitable outlet right at her doors has been neglected. That outlet was capable of absorbing 20 million bushels per year and would have paid in the neighborhood of 85 cents per bushel for comparatively low grade grain right at the farm.

The surplus wheat, however, would not have been sold in the form of grain but as bacon hogs to Great Britain. Practically ever since the signing of the Ottawa agreements there has existed in the United Kingdom a market capable of absorbing one and quarter million more hogs than have actually been exported from Canada. During this period hogs have averaged well over seven cents per pound or \$14 per 200-pound bacon type animal.

Just what might have happened had Canadian wheat farmers possessed the necessary hog foundation stock is pictured by J. S. McLean, president, Canada Packers' Ltd., in his annual statement as head of that company. Mr. McLean says:

"Wheat can be converted into hogs. A bacon hog can be produced from approximately 16 bushels of wheat. If, out of the surplus of wheat, there had been produced during each of these three years an extra 1 1/4 million hogs, the amount of wheat consumed in the process would have been 20 million bushels per year. This conversion would have yielded the producers a very large profit—as between the market value of the wheat at the farm and the market value of the hogs at the farm. Moreover, by absorbing 20 million bushels of wheat per year it would have helped materially to relieve the burden of the overhanging surplus." Financial Post.

### Judge Criticizes Himself

#### Apologies In British Court For Remarks Made At Trial

At the London Sessions recently the presiding judge, Sir Herbert Wilberforce, not only withdrew some remarks he had made in the course of a trial in which the jury stopped the case, but criticized himself for having made them.

"I ought to say, with some regret," he said, "that some observations fell from me yesterday which ought not to have been done. They were made under the influence of temporary emotion of which no one occupying the position I do ought to be guilty."

This is a handsome apology, one which could not have been more ample, unsparing of himself and does his lordship proud. A public man who is capable of apologizing in public and even condemning himself, shows that he is a "big" man to do it, and worthy of the office he holds.

This is in the British tradition of things, and ranks with the apologies which have been made in the House of Commons by Premier Baldwin and other cabinet ministers who have openly apologized when they erred in making some statement.—St. Thomas Times-Journal.

### This Bird Is Wise

#### Gull At St. John Lets The Sun Thaw His Fish

Daily a big fat gull flies to a cold storage plant on the St. John, N.B., harbor front and boldly waddles to a place where men are loading frozen fish. The gull grabs a choice specimen, drags it to one side and calmly stands by while the fish thaws out. When the sun has done its work the gull dines. The men are thinking of calling him "Frozen Face," because of his expression and his appetite for frozen fish. And the gull grows tamer and fatter.

### Diamond Trade Improving

Continued improvement in the South African diamond trade has led to the belief that Kimberley will resume full production this year. The Dutoitspan Diamond Mine is being re-opened and possibly will start production on a normal scale soon. Another Kimberley diamond mine will be ready for re-opening before 1937.

Gentleman—"Can you go into any business more profitable than begging?"

Beggar—"Well, sir, I'd like to open a bank, but I haven't got the tools."

### Third Man In Cab

#### Head Brakeman On Freight Train Is Not Very Comfortable

A news item that sounded puzzling to the layman came out of Washington the other day. It said that the Brotherhood of Railway Trainmen had asked the Interstate Commission, the body that rules U.S. railroads, to order the railroads to equip their engine cabs with softer seats, foot warmers and padded arm rests.

The explanation, however, is simple. The head brakeman on a freight train has to ride in the engine cab. He's the conductor's lieutenant at the front end, keeping a watch up there, getting down to turn switches, keep an eye on the string of cars back of the engine and doing the many other little things a trainman is hired to do.

But when the train is moving there's not much he can do, except sit in a corner of the engine cab and look out. To be out of the way of the engineer and particularly of the fireman, who, unless he has the help of a mechanical stoker, is busy shovelling coal under the boiler, the head brakeman gets into a spot somewhere near one corner of the boiler. It's a hot spot in the summer, a cold-on-one-side-and-hot-on-the-other-side in the winter, no cushions or arm rests soften the jars of the locomotive during fifty or sixty miles. If he puts his feet up against the boiler they roast; if he doesn't, they freeze. So curtains, padded arm rests and foot warmer are in order.

In Canada, we are told, a similar request has been made to the Board of Railway Commissioners, the Dominion's railway ruling body. But for some reason or other, foot warmers are not demanded, probably because Canadian trainmen are not subject to "cold feet."—St. Thomas Times-Journal.

### A Talking Chair

#### Cincinnati Dentist Says It Helps Entertain His Patients

A Cincinnati dentist told the National Dental Association "Beethoven's Fifth Symphony can be of great assistance when the dentist tackles a stubborn molar."

Dr. J. H. Sharon, addressing 200 Negro dentists attending the convention, disclosed for some time that he had entertained patients with music, literary discourses and reports of ball games provided by means of devices attached to the head rest. He said the "talking chair" could be manipulated so only the patient heard the program or so all within the office heard it, as desired.

Clerk: "Please, sir, there's a traveler been waiting two hours to see you."

Boss: "Send him away, and apologize for not having done so two hours ago."

A flea, 21 inches long and having saw-like teeth, has been found at Mount Cook, New Zealand.

### Situation In Palestine

#### Conflict Over Jewish Immigration And Land Ownership

The troubled situation in Palestine, where the conflict over Jewish immigration and land ownership has broken into open fighting, was considered in a special session of the World Jewish congress at Geneva.

David Ben Gurion, in a message delivered from London, warned of "the danger that the doors of our homeland may be closed" in a cessation of immigration which has been objected to by Arab leaders.

Gurion, who is chairman of the executive of the Jewish Agency for Palestine, recognized by the League of Nations as the supreme Jewish authority in the Holy Land, and president of the Palestine Jewish Federation of Labor, addressed his message directly to the congress, the first international assembly of its kind.

"There is need for the mobilization of all Jewish forces in defence of our rights in the Diaspora (all lands outside Palestine) and on behalf of Palestine," he said.

### Strange Collection Of Plants

#### St. Louis Garden Has Thirteen Different Species From Antarctic

Shaw's Garden at St. Louis, Missouri, known the world over for its display of plants and flowers, now has on exhibition thirteen different species of lichen plants—a collection of Admiral Richard E. Byrd, famed Arctic explorer.

The collection, as strange and unusual a display as has yet been offered to nature lovers at Shaw's Garden, represents the last bit of vegetation the Byrd expedition saw as they approached the South Pole. The rugged, moss-like growth was observed by the expedition as it eked out a precarious existence on the northern exposure of mountainous rocks within 200 miles of the pole itself.

### Authority On Heraldry

#### Office Held By Sir Gerald Wollaston Dates From 1418

Sir Gerald Wollaston, Garter King of Arms, was responsible for the ancient ceremony of proclaiming the King's Coronation next May. He is a barrister and an ex-diplomat, as well as an authority on everything connected with heraldry and pageantry. The two are in his blood, for his grandfather was a Herald at Queen Victoria's Coronation. His father, Sir Naylor Wollaston, compiled the standard Anglo-Persian Dictionary. Sir Gerald has held the office since 1930, and will have to retire in three years, when he will be 65. It is his business to supervise the work of the College of Heralds. His office dates from 1418.

From Germany comes news of the discovery of a method for making artificial pumice.

Ice cream was known as long ago as the 17th Century.

## A Valuable Discovery

#### Scientists Find Poison Ivy And Vitamin C Are Related

A peculiar relationship between vitamin C and sensitivity to poison ivy has been observed in experiment on guinea pigs. When the animals were on a diet deficient in the vitamin, they were insensitive to the poison ivy, but when the vitamin was applied to their skin they became sensitive to the poison ivy and exhibited severe reactions.

Application of the vitamin to the skin was necessary to produce this sensitiveness, reports Dr. F. A. Simon, of Louisville, in a report of his experiments published in "The Journal of Immunology." When the vitamin C extract was injected into the veins, the muscles or the abdomen, the sensitivity was not produced at all or to only a slight extent.

The whole body of the guinea pig became sensitive to the poison when the vitamin was applied to only a small area. The agency in the skin that produced the sensitization spread rapidly. If the area of the skin to which the vitamin extract was applied was removed within 24 hours, the sensitivity to the poison did not develop in the skin on other parts of the body. If removal of this spot of skin was delayed longer than this period the sensitization spread to all parts of the skin.

Efforts to get this same reaction in rabbits, rats and cats were unsuccessful. What possibilities this discovery has for making human beings less sensitive to poison ivy or for treating individuals suffering from contact with the plant still remains to be discovered, as no experiments with human beings have been made. There is a great difference in sensitivity to poison ivy. Some people can touch the glossy leaves of the plant with impunity, while others develop severe inflammatory outbreaks all over their body if they come within ten feet of the plant. The poisonous factor in the plant is a volatile oil. Those who are extremely sensitive are affected by the small amount of oil that is evaporated from the leaves carried as vapor in the air and condensed on their skin. Persons with light-colored skins seem to be least sensitive to poison ivy.

Vitamin C, which produces the sensitivity to poison ivy in guinea pigs, also is known as ascorbic, hexuronic and cevitamic acid. It prevents scurvy, which affects the bones, skin and muscles and which is sometimes accompanied by hemorrhages of the skin. It is contained in many fruits and vegetables. It was first extracted in bulk from orange and lemon juice and later was obtained much more plentifully from paprika.

### Recruiting In Britain

#### Military Leaders Trying Hard To Fill Up Empty Ranks

Recruiting propaganda of every description now floods Britain as military leaders seek to encourage reluctant British youth to join the colors.

With oratory, appeals to national pride, emphasis on the advantages of army life, and attention to the seriousness of the situation, the efforts to fill empty ranks in the territorial forces especially, are daily becoming more pronounced.

Secretary of State Duff Cooper leads the pressure for recruits with his outspoken comments on pacifism and war dangers, and with his hints that conscription may become necessary.

### Pedigree Dogs Are Costly

American Owners Spend \$30,286,-392.50 In Six Months For Their Care

American purebred dog owners increased their spending to \$30,286,-392.50 in order to feed, kennel and give simple medication to their pets during the first half of 1936, according to a survey released in New York by the American Kennel Club, governing body of the sport of dogs in the United States.

This is an increase of some 23 per cent. over the \$24,535,737.50 spent by dog owners during the first six months of 1935.

Noise regulations were enforced by cultured Greeks of Sybaris in 700 B.C.

## Rejoice in Cutwork Without Bars

PATTERN 5645

This cutwork in simple lines—no bars—will transform your buffet or add a smart touch to your entertaining when used as tray cloth or doilie. You can do the flowers and butterflies all in natural colors or do the entire design more conservatively in one color. In pattern 5645 you will find a transfer pattern of a doilie 10 x 15 inches and two doilies 7 x 10 inches; illustrations of all stitches needed; material requirements; color suggestions. To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

**Iron the Easy Way**  
**Coleman**  
**IRON**

**Why You Should Have It**

1. Costs only 1/2 an hour to use
2. Lights instantly
3. Heats in a few seconds
4. Quickly ready for use
5. Maintains even heat
6. Hottest at the point
7. Irons with less effort
8. Saves 1/2 ironing time
9. No fire to build
10. No shoes to carry

**Priced as Low as \$5.95!**

Now you can iron in cool comfort in any part of the house... even outdoors beneath a shade tree. The Coleman iron is self-heating. No gas, no connections. Carry it with you anywhere. Several models available at New Low Prices. Ask your dealer or write to The Coleman Lamp and Stove Co., Ltd., 107 W. 11th St., Saskatoon, Sask.

## Thou Shalt Not Love

— A NOVEL BY —  
 GEORGIA GRAIG

CHAPTER IV.—Continued

"Whew! So it's like that! I thought there was something—the minute I saw you—Egyptian yourself—those eyes—your skin. . . Or say, maybe you're some nabob's headdress in disguise, seeing the sights, eh?"

Starr smiled, but did not look at him. "Not an headdress," she said slowly. "Merely the holder of an heirloom—of most indeterminate value."

The man's eyes were puzzled. He glanced around the room. He knew the place. There was no uncertainty about the type of people who frequented it. Particularly about the women who frequented it. Oh, most especially about the women. . . And yet—Here was a girl who looked like some Egyptian princess come to life, and she spoke like—Michael Fairbourne gave it up. No girl he knew could come back at him with the Arab evening prayer for an answer, and he was fond of bringing into the conversation whenever he could some reference of that one trip of his to Egypt.

Better watch his step, though, when he got right down to talking to a daughter of the Nile. If she was one. There was something, mighty American about this girl, for all of her mysterious eyes. And he must not forget that his one interest in talking to her right now—in talking to any girl—was. . .

He lifted his cocktail glass, smiling at her over it.

"You," he remarked, "if I remember, were complaining just a few hours ago about wanting to play. You seem to be doing all right. Hope I didn't waste any sympathy."

"You don't understand," said Starr, and wondered if she shouldn't go. After all, did she have any right to be here under such false pretenses?

The man laughed. "You said you wanted to play, didn't you? Well?"

Her eyes glowing with that strange, mysterious inner fire, Starr faced him. She repeated, as if it were a lesson well learned in a voice despairing, desperate, the exact words she had said to this same man at noon on the sunlit Avenue:

"Yes! More than anything else on earth, I do want to play!"

And then a rush of hot, incoherent words that for the life of her she could not have held back, came from her quivering lips. The voice of suppressed emotion too powerful to control that all day had been gathering for its climax, the cry of a bitter, tortured soul that tore through all the civilized repression which she had sought to bring to her aid through philosophic reverie.

She did not seem to be talking to the man especially. She was crying out to the world at large, and to Heaven above, in the sordid atmosphere of that cafe which in her mental state might as well have been a mosque or a Bowery mission.

"Yes! I want to have everything I've never had! I want to crowd a lifetime of excitement into every single day! I want to spend money; I want gorgeous clothes; I want to be so beautiful that every woman will envy me, and every man will want to love me. I don't want to think of yesterday nor tomorrow—just today! I want to dance and

sing and laugh. I want to be as bubbly as champagne!"

Her voice trailed off, the burst of passionate energy spent. What was the use? She might as well wish for the moon. She couldn't even be here under false pretenses talking to a man at all, if she hadn't run away from the same man into the Museum and then as a sort of reaction decided to have some kind of a fling at least with her last pitiful bit of change. He would never understand that. Nobody would. But who would believe her reasons—or that she, young as she was, was one whose sands of life were already all but run out?

A damp chill clouded everything. The blare of the orchestra might as well have been from another world. Her eyes must have been moist for the tall figure of the bronzed stranger who had so carelessly and confidentially asked to sit beside her went suddenly blurred.

In a daze she felt his hand touch her arm. He was speaking to her, the queerest odd note in his voice.

"You and I must have a serious talk, young lady," he announced in that masterful tone of his. "I thought so the first time I saw you on Fifth Avenue—I was so nearly certain of it that I almost chased you later in the day, and when I marched into here a few minutes ago to get out of the rain and saw you, I was certain of it. . . You—you sound as if you were the very girl I'm looking for."

A vague remark, but as he said it in that crisp voice of his there was something so impersonal in the tone, the intonations, that Starr had no feeling of discomfort which would certainly have been the case if a more personal tone had crept in. She glanced at him shyly, but he was not looking at her. His eyes were narrowed, as if he were deeply considering some important problem.

"I—I don't understand," she said, her tone almost a whisper.

He nodded, and his grin came back. "You'll will. I'll see to that. . . Let's dance."

Starr had never had much opportunity to dance, but she loved it. She was a dancer born, and feeling as she did tonight it would have made no difference to her whether she was dancing in a questionable night spot like La Luna, on a pocket handkerchief floor, or on the sands of the great desert. Dancing with this stranger who had so oddly come into her life, though, was a breathless business, would have been even if it had not been for the novelty and her own devil-may-care attitude which she still could not quite understand. He was so tall and so graceful as he swept her around the room; she could not have helped following him if she had never danced a step in her life.

She was panting a little, her mysterious eyes shining, when they paused a moment at the close of the dance, and the other dancers set up an insistent clamor for an encore. The music swung into a rumba and Starr was in his arms again. That was one dance she had never tried in her life, had never even seen. But when her tall companion swung into the little mincing, provocative steps, she followed his lead easily, as if she had been dancing with him all her life. It was a mad dance. One to make every nerve tingle and the blood pulse hotly through the veins.

Starr forgot that she had not always been dancing through life. She forgot the curse of Tut-Amen-Ra—that she was doomed to live but six months. She had never felt so gloriously alive. She forgot her grief over going into eternity without living, for she was living.

When the music slowed to a close, she looked up into the tall, bronzed man's face as he led her back to their table. With glowing eyes, still under the spell of a sort of pagan music which was new to her, she said:

"That was glorious! I didn't know dancing could be like that?"

There was a twisted smile on his lips as he glanced down at her.

"You've got a good racket," he murmured. "You said that as if you mean it. Nothing like throwing your heart into your profession. . . He hesitated, as they sat down, eyeing her. "But my guess is you're rather new at it? Swell! For me."

Starr felt the painful flush that crept to her cheeks. It was as well for her she did not understand. That was what she said.

"I—I don't understand."

The man laughed comfortably.

"Perfect! Better and better."

"I—I've got to go now," Starr said, but he touched her hand, beckoning to the waiter. "Wait a minute. I want you to tell me one or two things. Will you?"

"Of course—if I can." Starr's eyes showed surprise.

"Okay. . . First: Are you by any chance an orphan?"

Her eyes widened. "Why, yes, but how did you—"

"Never mind. Next: It couldn't be that you're here in New York on your own—no kin? No next of friends, as they say, or something like that? No husband nor entanglement? No too-persistent—er—boy friends?"

"No," said Starr. "Especially the last." There was a resentful note in her voice. "But I can't imagine why you should—"

"Never mind," the masterful one repeated. "Good! There'll be no more questions. In fact, the fewer the better for what I have in mind. Don't like questions, anyhow. . . Believe in thinking like a Chinese valet I once had, who would insist, when I'd want to know something or other: 'Mind always sublimely innocent of idea not it's own business.' What I've just asked you is my own business, or at least I think so, and—"

"You'll have to explain, I think," Starr said, and was uncertain whether the joy of her dance, the sense of being "in things" was worth what was beginning to look like a rather impertinent cross examination which was not justified. Still it was nice here, no matter what kind of place it was, and she was gathering from a few of her companion's dropped remarks that it was not exactly his kind of rendezvous. Much better than being outside—alone—going nowhere.

It looked anything but cheerful outside. A cold rain rilled down the wide curtained window, blistering the pane with sleety-looking drops; mist hung around the street lights. It would probably rain the rest of the night. It made even a place like this a cocoon of delight to a forlorn girl—a place that was all warmth and soft lights. What if there was heart-break, too? Wasn't it the heart-break she was trying to forget.

The man beside her was saying something, but at first she hardly realized what it was. It made so little difference. She was watching his hands fumbling a little nervously with his glass, as though he were a bit uncertain himself just what it was he wanted to say. She heard him repeat:

(To Be Continued)

### A Speedy Locomotive

#### One On German Railroad Makes 92 Miles An Hour

One of the fastest steam locomotives in the world is run by the German National Railroad Company. It makes 109 miles on forced runs and an average of 92 miles per hour on usual runs. This speed is attained partly through the use of a streamlined encasement which covers the entire locomotive.

The new locomotive is eighty-five feet long and fourteen feet high, and its larger wheels have a diameter of approximately seven and a half feet. At the speeds mentioned the locomotive hauls a train of five express coaches weighing together 250 tons.

The engine is a three-cylinder super-heated express train locomotive developing about 2,800 horsepower under twenty atmospheres. It has two running axles in front, and behind are three transmission axles.

On account of the high sustained speed of the locomotive, special attention has been paid to the brakes. The train can be stopped within slightly more than one-half mile at a speed of 109 miles. Besides, there are photoelectric automatic brakes which function in case a stop signal is overlooked by the engineer.

### A Smuggler's Trick

Surprising tricks are used by smugglers on the Polish-German border in Upper Silesia. Recently the Reich reduced the duty on ducks. Germans, however, didn't want ducks, but geese; so smugglers fixed ducks' heads and feet on dressed geese and got them through at the lower rate.

A dentist in Illinois diverts the attention of his patients by showing moving pictures on the wall in front of them.

### Lake Water Analyzed

#### Astronomer Has Discovered Why It Appears Intensely Blue

Crater Lake, in the Cascade Mountains near the California border of Oregon, is the crater of an extinct volcano. Its waters are an intense blue, "unbelievably blue," according to many observers. The reason for this blueness has been one of the subjects of the investigation conducted under the auspices of the National Academy of Sciences. Dr. John C. Merriam, president of the Carnegie Institution of Washington, selected for the investigation Dr. Edison Pettit, an astronomer on the staff of the Mount Wilson astronomical observatory. An astronomer was selected because it was believed that the color was a light phenomenon and Dr. Pettit is an authority on light.

Analysis of the water of the lake showed this body of water was purer than most drinking water, only 88 parts in a million of solid matter suspended in it, while 500 parts were allowed in drinkable water. It contained only ten parts of chlorine, while drinking water may contain twelve. Chemical contents and suspended matter were eliminated by tests as agents giving the water a blue coloration.

Experiments were then made on the scattering of light by various kinds of water. This scattering is due to the reflecting of the light rays selectively by particles or molecules of water deep in the body of the water, as distinct from light reflected at the surface of the water. Ordinary tap water contains so much suspended matter that both the long red and the short blue rays are all reflected back out of the water in equal amounts, making the reflected light as white as the beam that entered. Ordinarily distilled water reflected back slightly more of the shorter wave lengths, giving the light coming back a slight bluish tinge. Dust-free distilled water gave a strong blue color to the light reflected back, and so did ocean water that had been allowed to settle undisturbed for years, and also Crater Lake water. A similar effect also accounts for the blue color of the sky, Dr. Pettit concludes.—New York Herald Tribune.

### An Expensive Bed

A sign of prosperity times is a mahogany four-poster bed which sells for \$1,900, that was shown during the furniture show in the Merchandise Mart at Chicago. Carved of solid mahogany and weighing 1,150 pounds, the bed was ordered by several retailers.

### Little Helps For This Week

Fear thou not for I am with thee, be not dismayed for I am thy God; I will strengthen thee, yea I will help thee, yea I will uphold thee with the right hand of my righteousness. Isaiah 41:10.

Lord, be Thou near and cheer my lonely way;  
 With Thy sweet peace my aching bosom fill;  
 Scatter my cares and fears, my griefs allay.  
 And be it mine each day  
 To love and please Thee still.

What if your wicked nature rage against you? There is a river the streams of which will make glad your heart. Learn in quietness and stillness to retire to the Lord and wait upon Him. Then you shall find peace and joy in the midst of the trouble of this world. And so wait to know what is your work and service to the Lord every day in your place and station, and He will make you faithful therein, and you will not want for help, support or comfort.

### An Ingenious Library

#### Unusual Service Given To Patients In Detroit Hospital

An ingenious rolling library built on the wheels and framework of an invalid chair provides reading matter for patients of Harper hospital in Detroit, Michigan.

The library service is the direct result of the long, lonely hours spent in a hospital years ago by Mrs. Joseph Sanderson, who said: "I was in a city, with no friends, and the hours dragged horribly. I welcomed something to read and I know how books can brighten up one's time during sickness."

There are now more than 700 volumes, mostly popular fiction, in the library, and Mrs. Sanderson has 20 volunteer "librarians," who help her distribute books. It has become necessary to engage Miss Elizabeth Morley from the Detroit library to catalogue the numerous volumes.

The library consists of shelves built around the framework of an old wheel chair and there is a small desk on the top shelf, which the volunteer worker uses to check books in or out.

The service is free and the library frequently receives new and expensive works that have been presented to inmates.

Trans-Atlantic liners passing near the Azores use floating kegs to post the mail of passengers. The mail is picked up by fishermen.

### LOCAL & GENERAL

Miss Enith Hunsperger of Edmon-  
ton visited her home here last week.

Mr. Thomas Stubbs, of Victoria,  
is visiting his son Mr. T. W. Stubbs  
and family.

Mr. Albert Myers returned on  
Sunday from a month's visit with  
his nephew Harry at Los Angeles.

Mr. Boyd Cressman of Kitchener,  
who has been visiting relatives here,  
left for Vancouver on Saturday.

For REAL Bargains in Men's  
and Boys Footwear—T. E. Scott.

St. Cyprian's W.A. will hold a  
Tea & Sale of Homecooking at  
"The Bookerie" on Saturday,  
September 26.

Mrs. E. P. Smith and daughter  
Mabel, of Hoquiam, Wash., are  
visitors for a few days with Mrs.  
Smith's sister, Mrs. Mary Rodney.

Mrs. Erven Rodney has returned  
home after spending a two weeks'  
holiday in Calgary with her sisters,  
Mrs. W. K. Nelson and Mrs. W.  
Waycott.

Ed. Ford of the Adshead Garage,  
who wrote his examination as an  
automobile mechanic in Calgary two  
weeks ago, received his certificate  
of proficiency on Monday.

Rev. F. Vincett who has had  
charge of the M.B.C. Church for  
the past three years, has resigned  
his position and will leave shortly to  
reside in British Columbia. He will  
hold an auction sale of his household  
effects on Saturday at 2 p.m.

T. E. Scott Stocks a Complete  
Line of Fall & Winter Underwear,  
both in Combination or Two-Piece  
styles, \$1.10 per Suit up.

Mr. and Mrs. Morgan Cressman,  
Miss Grace Hunsperger, Miss Verrill  
Ryckman and Mr. Boyd Cressman  
motored to Raven Tuesday last to  
visit Bert, Douglas and Bruce Cress-  
man, and also Mr. and Mrs. Howard  
Herber.

Harvest Festival will be observed  
at St. Cyprian's Church on Sunday,  
September 20 at 3 p.m. Contribu-  
tions of fruit, vegetables, flowers,  
etc., however small, will be gratefully  
received, and should be left in the  
vestibule of the church on Saturday  
afternoon, September 19.

Charlie Mortimer, F. Dunlop and  
W. G. Liesemer finished up their  
fishing season on the Raven, going  
out Saturday and returning Sunday.  
The weather wasn't the most favor-  
able, but they report a good time  
and came back with a mess of Loch  
Leven trout.

The "Big Three," Bert Fisher,  
John Topley and Frank Hesselton,  
are making preparations to hike for  
the mountains on their annual drive  
for mountain sheep, goat and bear.  
This year they have invited A. G.  
Studer to join them, and John Rindal  
will provide the team to pack out  
the supplies and bring in the game,  
if any.

The "Big Four," Clint Reiber,  
Jim Kirby, Tom Johnson and Jack  
McCloy, wound up their fishing in  
the Big Red on Sunday. It was too  
cold for good sport, but they landed  
a good sized Dolly Varden weighing  
three and a quarter pounds and  
measuring twenty-one inches, along  
with several other good ones.

We Have Men's Heavy Wool Sox  
at 4 Pairs for \$1.00.—T. E. Scott.

Miss Verrill Ryckman, daughter  
of Mr. and Mrs. George Ryckman  
of Bellingham, Wash., left Saturday  
for her home after spending a  
month's holiday visiting relatives  
and friends here. She was accom-  
panied by Mrs. Harry Steckley and  
daughter who, after visiting at the  
coast, will visit Mrs. Steckley's  
mother at Spokane.

### Boys' Band Annual Meeting

The Didsbury Boys Band held its  
annual meeting after band practice  
Wednesday evening.

The president, business manager  
and secretary each gave their reports  
which showed that the receipts had  
been in excess of \$500.00, which  
had been expended principally on  
uniforms and a new Sousaphone.

In laying out a policy for the com-  
ing year, the president said that  
efforts were to be made towards  
having a holiday camp at Banff  
next summer.

Ernest Clarke, president; George  
Rords, business manager; and John  
Goertz, secretary, were re-elected  
for the ensuing year.

### Press License Threat Stirs Lt.-Gov. Bruce

At their fall meeting at Peter-  
borough, Ontario, the daily news-  
papermen of that province passed a  
resolution deploring Premier Wm.  
Aberhart's announcement that the  
licensing of newspapers would "re-  
ceive my immediate attention," and  
went on record as opposed to any-  
thing interfering with the freedom  
of the press.

The publishers, members of the  
Ontario Provincial Printers Associa-  
tion, went on record as concurring  
in statements made by Lt.-Governor  
H. A. Bruce, who opened the new  
plant of the Peterborough Examiner  
that, "If a newspaper is to be align-  
ed on the side of enlightenment it  
must be free of all arbitrary and  
tyrannously enforced restraints in  
political censorship."

The resolution said:

"We most deeply deplore the  
announcement regarding licensing  
of newspapers in the province of Al-  
berta. We feel that any interfer-  
ence with the freedom of the press  
cannot but lead to the destruction  
of true democracy.

"We urge the publishers of Al-  
berta to resist with all means in  
their power the threat of dictatorship  
in the realm of newspaper publish-  
ing. We assure the Alberta publish-  
ers of our moral support in their  
fight for the continuance of a free  
press."

A meeting of the Dairy Calf Club  
will be held on Monday, September  
21, at 8 o'clock p.m. in the Didsbury  
public school basement. Everybody  
welcome.

Mr. A. Bishop will hold an auction  
sale about the middle of October  
when he will sell his farm stock and  
implements. Mr Bishop is leaving  
the farm to reside in Calgary.

See the "Smoothie" Advt. at the  
Builders' Hardware and learn how  
to rest in comfort!

Mr. and Mrs. Ernest Traub whose  
marriage at Acadia Valley was a  
social event in July, have returned  
from their honeymoon motor trip to  
Ontario. They were honored Friday  
evening by a gathering of about  
forty friends who delightfully sur-  
prised them at the home of the  
groom's parents. The guests-of-  
honor were presented with many  
lovely gifts by those present.

We Have Men's Good Leather  
Lined Gloves from 50c per Pair up.
